Axxess Software Architect Mark Lopez To Be Featured Speaker at MVP MIX

DALLAS, March 8, 2018 – Axxess software architect Mark Lopez will be among the featured speakers at MVP MIX, a two-day international developer conference being held at the University of Texas at Dallas March 15-16. Training at the conference covers .Net Core, ASP.NET Core, Entity Framework Core, HTML5, JavaScript, and others. Other speakers will include several Microsoft MVP developers, as well as specialists from Google and other technology leaders.

“I think of myself as a lifelong learner, so I’m very excited to discuss OpenID Connect with some of the smartest developers in the industry,” Lopez said.

Lopez has been at Axxess, the fastest-growing home healthcare technology company, for three years. He began exploring technology at age 10 and grew up tinkering with everything from VBScript to Java. He has since expanded to understanding and working with a wide set of technologies and solutions, from server administration to front-end design. Most recently, Mark specializes in everything related to .Net and Typescript programming.

“We are so proud of Mark for achieving this prominence in the developer community in such a short time,” said Andrew Olowu, Axxess’ Chief Technology Officer. “Axxess continually works to hire the best and brightest minds to build our products, and Mark’s standing as a world class developer is a strong testament to that.”
