## OASIS EXPORT CREATION

View/OASIS Management/OASIS Ready for Export

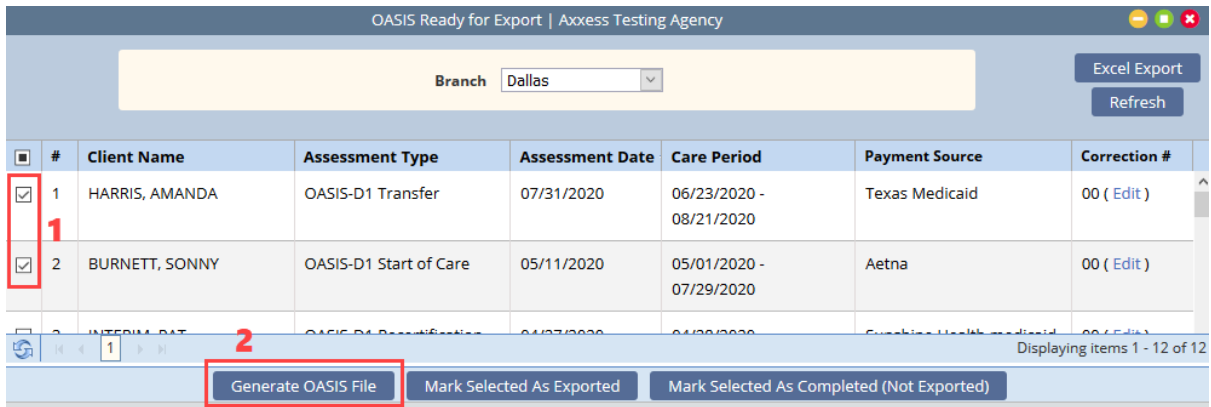

Once OASIS documentation is complete and approved in the QA Center, go to OASIS Ready for Export. Within the OASIS Export Screen, sort and filter by the below items & column headers.

- Branch - Filters by location/branch (if more than one).
- Check/Uncheck All - Allows the user to Check/Uncheck all OASIS currently filtered to allow for batch saving of documents.
- Client Name - By selecting this column header, the user can sort the list in ascending or descending (by Name) order.
- Assessment Type - By selecting this column header, the user can sort the list in ascending or descending (by Type) order.
- Assessment Date - By selecting this column header, the user can sort the list in ascending or descending (by date) order.
- Care Period - By selecting this column header, the user can sort the list in ascending or descending (by date) order.
- Excel Export - This function allows the generated list to be exported to Excel for further analysis.

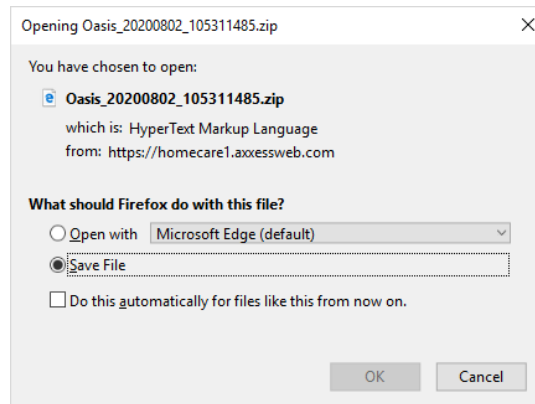

<input type="checkbox"/>	#	Client Name	Assessment Type	Assessment Date	Care Period	Payment Source	Correction #
<input type="checkbox"/>	1	HARRIS, AMANDA	OASIS-D1 Transfer	07/31/2020	06/23/2020 - 08/21/2020	Texas Medicaid	00 (Edit)

Select (check) the client OASIS records that will be submitted and select the **Generate OASIS File** button.

This action will generate a zipped XML file instead of a text file format used for state submission. Select the Save File bullet then select **OK**.

The file will automatically save to the Downloads file folder on the computer. Once a specific folder is created for OASIS submissions, drag and drop the zip folder into the designated folder.

While it is not necessary to open the file before submission, to open the zipped XML file, a zip file version software will be needed, such as win-zip or 7-zip. If opened, the file will need to be "re-zipped" before uploading it to CMS. When opened, the XML OASIS file follows this format:

```

Once the OASIS files have been exported, users may upload the file to CMS (QIES/QTSO) <https://qtso.cms.gov/> that follows internal organizational processes.

## MARKING AN OASIS AS EXPORTED

Once an OASIS is transmitted, the Final Validation Report is received, and the record was Accepted, the file should be marked as exported in the OASIS Export screen.

**NOTE:** This step is critical for organizations' ability to bill.

Generate OASIS File Mark Selected As Exported Mark Selected As Completed (Not Exported)

Select checkboxes of generated OASIS, then select **Mark Selected as Exported**. If the OASIS does not need to be exported, select **Mark Selected as Completed (Not Exported)**. To view and edit the list of Exported and Not Exported OASIS, access *View/OASIS Management/Exported OASIS or Not Exported OASIS*.

For both Exported and Not Exported OASIS, a grid will populate with the below available search filters.

- Branch - Filters by location/branch (if more than one).
- Status - Defaults to Active clients. The status may be changed to view All or Discharged clients.
- Excel Export - This function allows the generated list to be exported to Excel for further analysis.

## OASIS CORRECTIONS - KEY FIELDS

*View/OASIS Management/Exported OASIS*

If an error has been made in one or more key fields, or if an assessment was submitted in error, a cancellation should be generated and submitted to CMS. To generate the cancellation, access the exported OASIS through List of Exported OASIS Assessments and select the **Generate Cancel** hyperlink.

#	Client	Assessment	Assessment Date	Care Period	Exported Date	Payment Source	Actions
1	CROCKETT, SONNY	OASIS-D1 Start of Care	05/02/2020	05/01/2020 - 06/29/2020	05/14/2020	Sunshine FL	Generate Cancel   Reopen

This action will generate a zipped XML file instead of a text file format used for state submission. Follow the prompts to save the file to the appropriate file folder. Once the OASIS Cancellation files have been exported, users may upload the file to the CMS (QIES/QTSO) following internal organizational processes. Once the cancellation has been uploaded to CMS (QIES/QTSO) <https://qtso.cms.gov/> and was Accepted per the Final Validation, select the **Reopen** hyperlink.

#	Client	Assessment	Assessment Date	Care Period	Exported Date	Payment Source	Actions
1	CROCKETT, SONNY	OASIS-D1 Start of Care	05/02/2020	05/01/2020 - 06/29/2020	05/14/2020	Sunshine FL	Generate Cancel <b>Reopen</b>

A confirmation box will appear to remind users the OASIS will need to be resubmitted if already accepted by CMS. Enter the reason for the reopening and select **Yes**. Selecting **No** will take the user back to their list of exported OASIS.

**Are you sure you want to reopen the assessment?**

Note: If this OASIS assessment was already accepted by CMS (Center for Medicare & Medicaid Services), you will have to re-submit this OASIS assessment to CMS if changes are made to OASIS items.

Reason

Once **Yes** is selected, access the client chart through *Clients/Client Center*. In the client chart, the status of the OASIS is now listed as Reopened.

**NOTE: Only the assigned clinician will have the ability to make the update. Pending specific organization policy, select Action Menu/Details/Assigned To for updating the user assigned this task.**

Reopen the OASIS by selecting the appropriate blue highlighted Task. Complete the required updates to the OASIS and Select “Save & Continue” at the end of the OASIS. The OASIS will now flow to the QA Center for approval, and once approved, back to the OASIS Ready for Export screen. Locate the OASIS and under the Correction # column, select **Edit** and change the correction number to 00 and continue the export process outlined above.

In the event the OASIS had been accepted by CMS, locate the OASIS, and under the Correction # column, select **Edit**. A popup box will appear explaining the correction number procedures. For the OASIS that was accepted, select the drop-down and update the correction number to 01-Select **Save** at the bottom of the popup.

The correction number should only be changed if you are retransmitting an OASIS assessment that was previously accepted and needs to be retransmitted because of corrections you made.

The first record that is submitted to correct or inactivate an existing record must have a value of "01" in correction number. If that correction/inactivation is accepted and if a subsequent correction/inactivation is required, it must have a value of "02", and so on. In other words, the correction number on the first correction/inactivation must be "01", and the value on each subsequent correction/inactivation must be incremented by 1.

If an OASIS assessment was rejected and needs to be retransmitted after corrections have been made, use correction number 00.

## OASIS CORRECTIONS - NON-KEY FIELDS

If an error has been made in one or more Non-Key Fields, a cancellation file is **not** required, however if the OASIS was accepted by CMS, the corrected file will need to be exported and resubmitted. To correct Non-Key Fields, **Reopen** the assessment from the exported OASIS screen.
