## KEY FEATURE

## BENEFITS

### Staffing Solution

Intuitive scheduling and staffing software that connects home health organizations to available, qualified clinicians to fill open visits as needed

- Diversify network of clinicians
- Accept more referrals to grow business
- Avoid LUPAs from missed visits

### Reports

Comprehensive reports that provide visibility on patients, clinical, payroll, billing, financial, scheduling, employees and other vital statistics

- Monitor clinical compliance metrics
- Gain insights on operational performance
- Understand financials like cash flow, month-end close numbers and payer diversity

### PDGM Dashboards and Tools

Patient-Driven Groupings Model features like a gross margin calculator based on case-mix selection, potential LUPA alerts, etc.

- Ensure regulatory compliance and timely submissions and filing
- Monitor visit utilization and clinical risk alerts to improve patient care
- Inform management decisions with real-time dashboards

### All Payers Billing

Automated claims submission and processing with Medicare Direct Data Entry and managed care billing to get paid more, faster

- Conduct instant Medicare eligibility checks and PECOS confirmation
- Use built-in artificial intelligence to resolve and increase clean claims for all payers
- Submit claims instantly with a clearinghouse and direct connection to Medicare

AXXESS	COMPETITORS

(CONTINUED ON PAGE 2)

## Easy-to-use and Offline Documentation

Complete HIPAA-compliant notes and electronic visit verification with or without internet on native Apple and Android mobile apps

- Streamline point-of-care notes with built-in clinically intelligent tools
- Automatically save and sync when back online
- Work from anywhere, anytime on any device

## OASIS Scrubber

Built-in OASIS quality assurance tool that identifies inconsistencies, errors and missing information for correction before submission

- Speed up quality assurance review time
- Reduce claim rejections
- Maximize Medicare claim reimbursements

## Clinical Document Automation

Patient and OASIS data automatically flows to or auto-generates clinical documents such as the plan of care, summaries and medication profile

- Guarantee consistency with a single source of truth
- Save time generating and completing documents
- Improve patient experiences by focusing on care

## Data and Document Exchange Integrations

Interoperability that enables electronic referral acceptance, physician orders tracking, information exchange, etc.

- Accelerate document turnaround requiring physician oversight
- Empower patient-centered communications across providers
- Reduce overhead with fewer errors and time spent managing documents, following up and faxing

## CAHPS Surveys

Approved Centers for Medicare & Medicaid Services Consumer Assessment of Healthcare Providers and Systems patient engagement survey vendor

- Meet requirements and submission deadlines
- View real-time survey progress
- Benchmark results against competitors to identify strengths to market to referral sources

## Support and Resources

On-demand training such as a comprehensive certification program, help center, user community, walk-throughs, videos, blogs, FAQs and white papers

- Reduce onboarding time and costs spent educating staff with access to immediate answers
- Stay on top of regulatory news and industry issues
- Learn expert tips and best practices for success
